Overview for the XLT-S5 EZ2® Rotary Action File System Letter Size 5 Openings per side

The Datum EZ2™ Rotary Action filing system makes cluttered storage areas neat and accessible. A double-sided inner unit with a spin radius of 360° allows your office staff to store and access twice the amount of filing media in half the space. This model is a starter unit with shelves.

Efficient Rotation: Files are accessible from either side of the unit, making it perfect as a room divider. The system spins to close. Unlike older rotary filing systems, the unit rotates easily with the touch of a finger - no clunky foot pedal required.
