Re: Relocating radio communications equipment for Tyler County Volunteer Fire Departments

Dear Mrs. Skinner,

The TyCo Firemans Association is working to relocate the radio system for the county fire departments from its current location to the Woodville water tower located on Pine St. We are doing this due to the rising costs and stipulations that have been put on the current location by new owners. Our understanding is that the county has already moved their equipment due to similar circumstances. We are inquire with the county to see if the county would be willing to help us with the expenses that are incurred with this move. The city has agreed for us to do this and we will have no annual cost for having our radio system on the water tower. We will also be hooked to the cities emergency generator so fire protection for our county should have continuous communications. The Associations continuous responsibility is the maintenance of the new building that must me installed. For our move, we must put in a new portable building, finish the inside out, wire the building by a liscenced electrician, install an ac unit in building, put our antena on the tower which requires a climbing crew, and also trasfer our radio along with the cities radio repeater and the schools repeater to the new building. We have already done a test for the comminications reach and our conclusion is we are able to reach more dead spot areas with this move. We are looking to have all of this done as soon as possible before our contact expires with our existing location on December 31, 2020.

The estimated cost of this move is as follows:

DERKSEN BUILDKING \$1,955.00

Agenda

PARKER LUMBER \$774.76

NALCOM COMMUNICATIONS \$3,486.11

ELECTRICIAN (JOSH MCCLURE) \$500-\$800 PHONE VERBAL ESTIMATE

Sincerely,

THE TYLER COUNTY FIREMANS ASSOCIATION
