Consulting Services		\$ 0.00
---------------------	--	----------------

Total Year One		\$5300.00
-----------------------	--	------------------

PROPOSAL

EASYDOCS SOFTWARE:

EasyDocs is used by County and District agencies to post information to their websites for the public. This product allows the county agencies to post Commissioner Courts minutes, agendas, foreclosures, OCA, voter return, Covid-19 notices, and other dated postings.

EasyDocs is searchable to look for words or phrases in minutes filtered by a range of months/years to return all relevant references to this word or phrase over the identified meeting minutes or agendas. EasyDocs also allows attachments within the documents which no one else provides.

Additionally, there is a simple posting program where agencies can get bulletin board material online quickly such as probates or other citations. The same will work for the district clerk tax sales and other notices.

EasyDocs allows the agencies to drag and drop documents within directories that the application uses to post to the agencies' websites

ONLINE DOCKET SOFTWARE:

Online Docket is used by the County to extract the courtroom schedules from NetData instantly without having to run a report, print it out, and scan it back into the system.

Online Docket products a report/listing of the daily scheduled cases and also allows the user to drill down into the case to see court cost information.

Online Docket saves valuable time and produces a 'ready to use' report for the agency.
