SUPERIOR ADVANTAGES OF GHIBLI MACHINES

- Robust steel frame.
- Heating coil 1/2" in diameter (3/8" for most competitive models) leading to longer life and less likelihood of break-downs.
- Thermic steel combustion chamber assuring the best possible combustion.
- Combustion pressurized and thus independent of atmospheric conditions.
- Boiler at two or three turns of flame for the most complete and efficient use of fuel.
- The boiler is immersed in the same water which passes then to the pump and heating coil. Thus is obtained the double advantages of cooling the boiler and preheating the water. This assures increased production, a reduction in the consumption of fuel and a much longer life for the heating coil.
- Exclusive Ghibli thermostat controlling heat of water with bulb directly immersed in water—eliminates variations in water temperatures and reheating delays.
- Exclusive burner system of Ghibli construction with continuous ventilation and sparking for a regular and secure flame.
- Fuel tank of large capacity.
- Extremely easy to service.
- Pump with ceramic coated steel pistons. Assures maximum reliability and minimum operating noise.
- Adaptable for hydro-sandblasting from 1450 P.S.I. to 2900 P.S.I.
- Acid shooting capacity present in all models.
- Two detergent intakes (some models).
- Wide selection of lances.
- Trailer mounted units including all components for completely autonomous operation are available.
- For cleaning internal tubing, piping, cylinders, cisterns, etc., a rotating head model is provided.
- Cold water cleaners up to 2900 P.S.I.
- Hydro-sandblasting up to 2900 P.S.I. with hot or cold water. Steel, sand suction tube available.
- Bypass for recirculation of water in the pump.
- Lance nozzles can be manipulated into desired positions.
- 12-month guarantee on boiler and heating coil.
- Convertible into steam.
- Marketed in 35 countries.
- Special machines and systems available.
- Special fiber glass covers available for most models.

STANDARD ACCESSORIES — One thermostat for adjusting working temperature; one overload cutout protecting the pump's electric motor; one burner switch; one diesel fuel burner with continuous duty exceptional power ignition transformer; one washing lance with insulated handle; 40 ft. high-pressure hose.
