ROYAL

Royal 5005
All-Electronic
Print Wheel Typewriter
with Dual Pitch

In order to improve efficiency and increase office productivity, the all-electronic Royal 5005 accomplishes automatically much of the tedious work formerly performed manually by the typist. Although it's highly advanced in technology, the Royal 5005 is completely simple to operate. Its electronic keyboard is thoroughly familiar to any typist, so training and adjustment time are minimal. For business, industry and government, the Royal 5005 is the ideal bridge from yesterday's electromechanical typewriters to the automated world of microprocessor controlled electronics.

Control functions right from the keyboard

Virtually all operating functions are simply and easily controlled from the electronic keyboard. At the touch of a key margins are set, paper is positioned up or down, impression control is adjusted and line spacing may be switched to one of four settings. LED indicator lights alert the typist to the function currently in operation: pitch selection, line spacing, half spacing and the shift lock.

The versatile keyboard also provides repeat action for all 46 typing keys, as well as the space bar, the back space and correction keys, plus indexing.

Outpaces high speed typists

The Royal 5005 can handle the fastest typing. Even during sudden bursts of typing speed, the keyboard memory stores the last 16 characters typed and prints them in correct sequence without jamming or character misprinting.

Dual pitch for increased flexibility.

To accommodate the variety of print wheel type styles offered, The Royal 5005 switches pitch instantly from 10 characters per inch to 12 characters per inch. An indicator light reminds the typist which pitch is programmed. It's almost like having two machines in one.

Clean, rapid-changing ribbon cassettes

Royal has completely eliminated the mess and fuss of changing ribbons. Depending on the typing job, the typist may simply drop in a correctable carbon, single-pass carbon, multi-strike carbon or fabric ribbon cassette. Correction tapes are available in Lift-Off for correctable carbon ribbon and Cover Up for the other carbon and fabric ribbons.

Other convenient features

- Retractable paper support/page-end indicator
- Automatic paper insertion
- Automatic paper advance and ejection
- Electronic line space selector for 1, 1½, 2, 2½ spaces
- Up to 500-hour memory retention for functions
- Express back space key
- Vertical half space up and down keys for sub and superscripts
- Horizontal half space key permits insertion of a missing character
- Copy control
- Modular design and self-diagnostic system for rapid servicing

Specifications

Paper capacity: 16½"

Typing line: 13.2"

Dimensions: 22.2" (W) x 6.85" (H) x 19.4" (D)

Weight: 42 lbs.

Power requirements: 110V AC, 60Hz

Royal 5005
Simply perfect
because it's
perfectly simple.

Two-line correcting memory automatically lifts off 132 characters

In addition to conventional lift-off corrections, there's an exceptionally large, automatic, 132-character correcting memory. It's simple to delete as much as two complete lines by the use of the correction key. Errors are cleanly removed with a correctable carbon ribbon cassette and lift-off tape.

Laser-sharp impressions with interchangeable print wheels

Royal offers a wide selection of print wheels with distinctive type styles to fit any typing job. The durably constructed print wheels produce sharp, clean, perfectly aligned characters. Print wheel technology combined with advanced electronic design produce exceptionally quiet operation.
